PUBLIC PROJECT BRIEF / NO TRANSACTION TERMS

# Jatmasi 5 TPD Compressed Biogas Project

A development-stage clean-energy asset in Bharatpur, Rajasthan, designed to convert local biomass into transport-grade CBG while creating organised rural demand and nutrient recovery.

**5 TPD**
planned saleable CBG nameplate capacity

**13,500 m2**
converted industrial project area

**35,400 t/year**
current feedstock planning basis

**1,642.5 t/year**
planned CBG output at 90% utilisation

## The asset

One proposed greenfield plant at Jatmasi, Rupbas tehsil, using predominantly Napier grass with manure inputs. The intended gas route is CGD-led; definitive project-level offtake remains to be concluded.

## Plant 1 pathways

- Local cultivation and harvesting demand
- Collection, transport and plant work
- Transport-grade renewable gas
- Recoverable nutrient and bio-fertiliser pathway

**PROJECT FOUNDATION**

The project land is family owned and committed through a lease extending beyond the expected plant life. It may support lender security, subject to legal due diligence, documentation and lender acceptance.

**CAPITAL APPROACH**

Promoter commitment + privately negotiated external equity + secured project debt. Any government or policy support is excluded until formally sanctioned and compliant.

Haritika Group's 20 million lives figure is a long-term ambition across a future venture network. It is not a claim of Plant 1 reach or current impact.

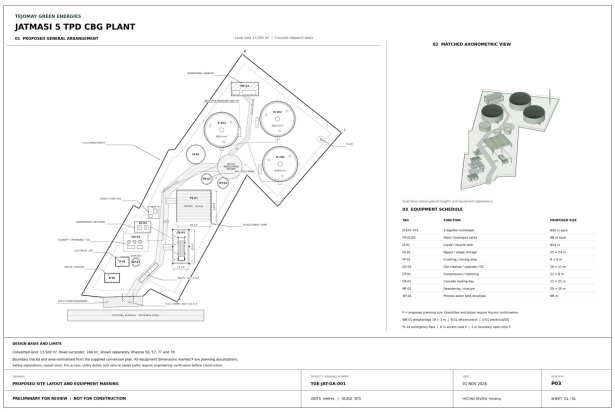

# A project you can inspect.

Public evidence establishes the location and current planning basis. Controlled diligence covers the source documents, commercial assumptions and transaction materials.

**ACTUAL SITE CONTEXT**

Applicant-supplied satellite view. The formal conversion plan governs the legal boundary.

**PRELIMINARY / NOT FOR CONSTRUCTION**

Site layout issued 1 November 2026. Detailed engineering and review remain open.

## Readiness ledger

| | | |
|---|---|---|
| 27 MAY 2026 | **Land conversion basis** | Reported completed for industrial biofertiliser and biogas use. |
| 30 OCT 2026 | **Revised DPR basis** | Prepared for the GOBARdhan resubmission process; not a sanction. |
| 1 NOV 2026 | **Preliminary layout** | Issued for review; Hycons review and detailed engineering remain pending. |
| IN PROGRESS | **Financial close** | Equity, debt, EPC, feedstock, approvals and definitive offtake. |

## Who should connect

**Private capital** · **Project lenders** · **Impact and climate** · **CGD and energy** · **Japan / Singapore bridges** · **EPC and technology** · **FPO and feedstock**
